All work must meet Energy Trust of Oregon specifications. This checklist serves as a reference guide only. Please refer to the current Specifications Manual for additional information and clarification. Specific reference sections are noted in italics.

- Condensate produced by the system is removed via an adequately sloped drainage system and flows to a suitable termination point. *IN 1.16*

- Unit location and clearances around the unit shall meet manufacturer requirements. *IN 1.14*

- Ducting and applicable fans settings shall be set in accordance with the manufacturer’s specifications. *IN 1.14*

- If only exhaust air is ducted outside of conditioned space, contractor should ensure combustion appliances are functioning properly and safely and carbon monoxide alarm requirements are met. *IN 1.2*
